Top 5 Question and their answers About Almighty Creator: Waheguru.

1) What proof we have that Creator really exists?

A. Man Vs. Creator

Let us take a simple example. How many people are killed in a typical day in the world from auto accidents?

If we do a Google search, the answer for killed is 3,287/day and injured people are 98,610/day.

The number of collisions is even much higher, every day!

Now let us see how many planets or stars crash today? Zero. In one year Zero, and in last million years, the answer is still zero! Who is maintaining all in motion, these big planets without collisions? Not you or I? Rather some very Intelligent entity, some invisible Powers. That power is Almighty Power, the God, and the Waheguru!

B. Life and Sun:

The Sun is about 93,000,000 (93 Million Miles) away from Earth. By scientific calculations, if Sun shifts away from its prescribed path by 18 Inches (One foot and a half!), our blood on Earth will start eventually freezing! And on the other hand, if Sun comes closer to Earth by merely 18 inches, our blood will start boiling! Such is the precision of our nearest life-giving star Sun. What power is keeping and has been keeping this so precise, 1 in hundred millions, is some Infinite know-how and power: that Power is Almighty Power! Does not matter what Name you give to that power, it still exists!

C. Water and Sand:

Just take a glass of water, fill it with 72% with tap water. Now put a sand pebbles, about 28% size of water into the glass having water. What will happen: the pebble will sink into the water of glass! Yet, the earth, a size of big pebble having 28% size, does not sink into 72% water or oceans of the world! Is it not a miracle, when we humans do our experiment, the man-pebble sinks, yet the Almighty's Earth-Pebble has been floating for Centuries! The power that is keeping it floating, is that miraculous power: the Almighty Creator!
